

EMF Protection

by Martin Keymer

THE PROTECTION PENDANT AGAINST RADIATION EXPOSURE

EMF-PROTECTION® by Martin Keymer is the result of intensive product development over many years to provide you and all of us with protection against radiation exposure.

WHY EMF-PROTECTION® BY MARTIN KEYMER?

OR: WHY IS IT IMPORTANT TO PROTECT YOURSELF FROM E-SMOG?

Due to the ever-increasing use of cell phones, computers and other wireless devices, we are exposed to unprecedented levels of technical frequencies that do not occur in nature! The new 5G network poses an even greater challenge in this regard.

Even those will be affected, who do not use cell phones or other wireless devices at all and therefore "only" come into contact with the frequencies indirectly and unconsciously.

This stress is intensified in connection with other technical low and high frequencies, direct and alternating voltages, radar radiation, satellite radiation, magnetic impulses, the real geopathic stresses and much more.

THERE ARE NOW COUNTLESS STUDIES AND PUBLICATIONS WORLDWIDE THAT PROVE THE NEGATIVE EFFECTS OF E-SMOG ON OUR HEALTH.

According to the studies, the omnipresent e-smog can be considered a risk factor for the following symptoms, among others:

- Affecting the nervous system, such as sleep and concentration problems, fatigue, headaches
- Cardiovascular problems, such as increased blood pressure
- Coordination disorders, dizziness, etc.
- Impairment of reproduction

E-smog is particularly dangerous for children, as it can have a lasting effect on the development of the blood-brain barrier, which is not yet fully developed in them.

The list could be extended endlessly!

HOW DOES EMF-PROTECTION® WORK?

The mouth-blown, beautifully shaped glass pendant contains a carrier substance with bioenergetic information for protection against the possible physical effects of e-smog. This information is modulated onto the carrier substance of the pendant using a special process. Councelling

This complex bioenergetic information counteracts the negative, stressful oscillations with stabilising oscillation spectrum, which leads to compensation of the respective stressed regulatory systems, e.g. the vegetative nervous system. This is achieved, among other things, by the following approaches, which have been developed according to the rules of the Networked Test and Therapy Technique according to Martin Keymer:

- Through the absorption of the interference oscillations by gemstones, such as the Black Agate.
- Different frequency oscillations of the EMF-PROTECTION® balance the respective stresses.
- By stimulating the metabolism, the body's energy production is boosted so that the body's cells can build up their metabolism and counter oxidative stress (increased accumulation of harmful free radicals) with the formation of new radical scavenging systems.
- The direct stimulation of the organic structures of the immune system, the hormonal system and the central control of the thalamus, the hypothalamus, the pituitary gland, the limbic system and the pineal gland as well as the blood-brain barrier supports the positive effect.
- By emitting certain oscillation information, which has an ordering effect on the water molecules, EMF-PROTECTION® stimulates the reorganisation of the ordering principle in our body. This is essential because we consist of about 70% water and its regulatory principle is messily changed by technical frequencies.

WHAT DOES EMF-PROTECTION® DO?

The EMF-PROTECTION® balances the harmful influences of radiation, to which we are continuously exposed every day.

According to the results of the bio-energetic tests, EMF-PROTECTION® has a stimulating effect on the self-healing powers.

- balancing the regulatory systems
- stabilising on the blood-brain barrier
- stabilising on the field effect of E-smog stress (see IIREC testing) -
balancing on the vegetative system (see HRV testing)

ON WHICH FINDINGS IS THE FUNCTION OF EMF-PROTECTION® BASED?

In the development of EMF-PROTECTION® we have brought in and combined all the knowledge and experience of bioenergetic holistic medicine and homeopathy.

In order to explain to you why we have taken this path of development, we would like to illustrate the following:

If we break down matter, e.g. a leaf, into smaller and smaller building blocks, we arrive at the smallest building unit of the leaf: the individual molecules. If we break down the molecule, we find the smallest components of a molecule: the atoms. If we decompose an atom, we come to the smallest components of the atoms: the quanta.

Quanta again are oscillations (condensed energy, information of electro-magnetic origin) and no more matter, i. e.:

THE WHOLE "MATTER" IN OUR UNIVERSE IS IN THE SMALLEST COMPONENT FINALLY ONLY OSCILLATION!

Everything vibrates in itself - and everything vibrates in everything. Everything is connected with each other, everything is vibration.

The different vibrations of the individual building components of a leaf result in an overall vibration spectrum. Thus, a leaf has both a specific and an individual vibration spectrum - like the whole tree, like the human being who sleeps under it, and the bird that builds its nest in it.

EACH OF US HAS OUR OWN INDIVIDUAL VIBRATIONAL SPECTRUM.

OUR INDIVIDUAL VIBRATIONAL SPECTRUM IS SHAPED BY OUR WAY OF LIFE, NUTRITIONAL HABITS, EXPERIENCES, ETC. AND SUPPLEMENTED BY THE PHYSIOLOGICAL VIBRATION SPECTRUM THAT DEFINES US AS HUMAN BEINGS.

This spectrum of our vibration then comes into contact with our external world. There are vibrations that strengthen our own vibrational spectrum, such as the earth's natural magnetic field or the biological normal, and vibrations that negatively affect our spectrum - it can even make us sick - such as e-smog or real geopathic stress, etc.

Certain vibration spectra are particularly harmful to us, because we are especially sensitive to them. This is particularly true for cell phone and mobile phone vibrations!

All these harmful vibrations add up with the abundance of other electrically generated vibrations, until it comes to a total load, which our body can no longer compensate from a certain point.

Whether young or old, human or animal: the EMF-PROTECTION® protects against the consequences of e-smog!

Due to its aura-open structure, it adapts to the individual energy field of the person who wears it within 24 - 72 hours.

THE EMF-PROTECTION® IS A COMPLEX THERAPY INFORMATION, WHICH IS WORN DIRECTLY ON THE BODY. IT SUPPORTS THE SELF-HEALING POWERS, HAS A REGULATING EFFECT AND THUS PROTECTS AGAINST THE FAR-REACHING AND DEEP-REACHING CONSEQUENCES OF TECHNICAL FREQUENCIES.

Our vibrational spectrum reacts to all vibrations that get in contact with it - both the strengthening and the weakening ones - and resonance reactions can occur. Negative resonance reactions can make us ill and negatively influence the previously described health impairments as risk factors.

The EMF-PROTECTION® is available as a jewelry pendant, as an ampoule with a soft fabric belt for babies

and leather pouch for children or with a small or large leather pouch that can be attached to either the collar or halter of your four-legged favourite

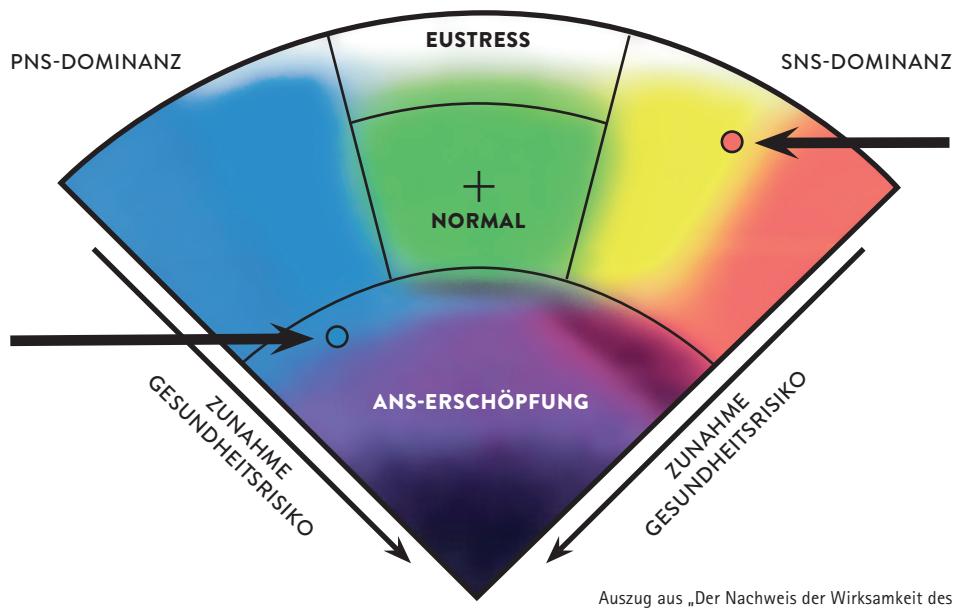

The EMF-PROTECTION® is available as a jewelry pendant, as an ampoule with a soft fabric belt for babies,

and leather pouch for children or with a small or large leather pouch that can be attached to either the collar or halter of your four-legged friend.

THE SCIENTIFIC EVIDENCE

At this point, we would like to emphasize in particular
TESTING BY THE INTERNATIONAL INSTITUTE FOR EMV RESEARCH
(IIREC), KREMS, AUSTRIA.

With the help of the patented precision teslameter and phase coherence resonance spectroscopy, the effectiveness of the EMF pendant was clearly proven - and on a demonstrably reproducible scientific basis! Result of the research work: "... all requirements of the biophysical testing according to IIREC are fulfilled".

BIOLOGICAL REPRESENTATION BY HRV

Similar to an ECG, HRV (heart rate variability) offers the possibility of verifying biological effects based on the heartbeat. It is measured in real time and shows how well the body can switch between stress and relaxation, i.e.: how adequately the body is able to respond to internal and external stimulations. The results of HRV testing during a cell phone call with the introduction of EMF prove the biological effect of EMF.

You can request the summary of the test arrangements and research results from us in the form of our brochure "Electrosmog - the (un)secret danger!?!".
